

Self-closing, symmetrical, synchronised, convenient folding mechanism

Table top detachable on both sides; can be stacked flat using stack protectors

5 year warranty!

Automatically self-stabilising sliders for wobble-free use at all times

Model TX1
Round tube

TREWA TX

Garden tables reinvented by us!

Developed in Switzerland, manufactured in Europe

Model TX2
Square tube

Model TX3
Round tube

Model TX4
Rectangular tube

Our convenient TREWA TX folding mechanism

self-closing, synchronised, symmetrical, elegant, robust

Four individually closing hooks fitted with tension springs automatically ensure secure and wobble-free support profile mounting. No more rickety hooks and rods!

The mechanism is operated using pivoted levers attached to both sides operating synchronously.

Table tops can be mounted and removed from both sides.

All support profiles are fitted with stack protectors, so table tops can be stacked flat without scratching each other.

The closed box made from durable stainless die-cast zinc minimises the risk of injuries and actually looks great, too!

Our convenient TREWA TX folding mechanism operating principle

This mechanism has a symmetrical design and works both clockwise and anti-clockwise.

Our TREWA TF fixed support brackets

simple, inexpensive, elegant, robust

You don't always need a folding mechanism. Instead of using our TX folding mechanism, you can also fit fixed TF support brackets which are also suitable for use with our table tops. This saves money and allows you to combine folding and fixed tables in an identical design on the same premises.

Table tops can still be removed by taking out the 4 hexagon headscrews, while the support brackets remain fixed to the table top.

Our self-stabilising "autolevel" feet

Always automatically ensure a wobble-free footing

The our TREWA T1 and T2 table models are fitted with automatically self-stabilising sliders. These adjust to any uneven surface within seconds and ensure tables never wobble. And you will never have to level them manually again.

Our TREWA T table frame series

versatile, attractive, durable, robust

Our new TREWA table frame series "T" consists of 4 basic models; 2 each made from round or angular tubes. All frames are manufactured from stainless steel throughout. Surfaces can be supplied either in a brushed stainless steel variation or in 4 standard colours. All frames can either be fitted with our convenient TREWA TX folding mechanism or TREWA TF fixed supporting brackets.

Model T1
Made from round tube with slightly angled feet.

Our fully integrated and self-stabilising "autolevel" sliders are supplied as standard.

Model T2
Made from square tube with slightly angled feet.

Our fully integrated and self-stabilising "autolevel" sliders are supplied as standard.

Model T3
Made from round tube with horizontal feet.
Manual levelling sliders are supplied as standard.

There are no "autolevel" sliders for this model.

Model T4
Made from rectangular tube with horizontal feet.
Manual levelling sliders are supplied as standard.

There are no "autolevel" sliders for this model.

5 year warranty!

The extended TREWA warranty!

- extensive, generous, fair -

Our TREWA T outdoor tables are products of the highest quality. For this reason, they are covered by an **extended 5 year warranty**. This includes all parts except for gliders and stack protectors, which are considered consumables. Our warranty therefore covers the complete table frame, the TX folding mechanism or fixed TF support brackets and the table top. Further information on our warranty can be found on our homepage www.trewa.com.

Here you can find a brief summary of all products we offer in addition to our outdoor tables shown in this catalogue.
